MadhaviSwami

Summary

Computer Science graduate with hands-on experience in Python, SQL, data analysis, and AI-based application development. Skilled in data cleaning, preprocessing, ETL pipeline development, exploratory data analysis, and data visualization using Pandas, MySQL, and Power BI. Experienced in developing data-driven projects involving automated analytics pipelines, computer vision, and AI integration. Seeking an entry-level opportunity to apply analytical and technical skills to solve real-world business problems.

Education

SVERI's College of Engineering — **Pandharpur, Maharashtra**
B.Tech in Computer Science and Engineering — *Oct 2022 – May 2026*

Technical Skills

- Languages: Python,SQL
- Data Analytics:Pandas, NumPy, Data Cleaning, Data Preprocessing, Exploratory Data Analysis (EDA), Data Validation, Statistical Analysis
- Database:MySQL, SQLite, Database Design, SQL Joins, CTEs, Window Functions
- Data Visualization: Power BI, Tableau, Matplotlib, Seaborn, Excel
- Machine Learning AI:Machine Learning Fundamentals, Face Recognition, Computer Vision, Hugging Face, AI Model Integration, Feature Extraction
- Tools: Git, GitHub, VS Code

Projects

Criminal Detection Using Face Recognition (Python, Flask, OpenCV, MySQL) — *Oct 2026.*

- Built a full-stack face recognition system that detects faces with YuNet and matches them to a MySQL identity database using 128-dimension SFace embeddings and cosine similarity.
- Added real-time webcam recognition at about 7 FPS (about 125 ms per frame), with live face boxes, match percentages and automatic capture of the best-match snapshot
- Designed 12 REST API endpoints and a 3-table MySQL database with foreign-key cascades, recording every scan with its image, matched identity and confidence score.

E-Commerce Data Analytics Automated ETL Pipeline (Python, Pandas, MySQL, SQL, Power BI)Sep 2026 - Oct 2026

- Automated a Python ETL pipeline that cleans, validates (70 checks) and loads 450K+ e-commerce records into MySQL.
- Wrote 18 SQL analyses (CTEs, window functions) and DAX measures tracking R$ 15.7M revenue.
- Found 97% one-time buyers and 2x late deliveries in the Northeast, and recommended fixes worth an estimated R$ 280K.

FashionFit (React, Flask, SQLite, Hugging Face) — *May 2026 -June 2026*

- Built a body shape calculator for 12 body shapes from body measurements and height.
- Built a full-stack virtual try-on app using the IDM-VTON AI model to show uploaded clothes on a user's photo.
- Added photo-based outfit tips for tops, bottoms, kurtis and sarees, by body shape and height

Extracurricular Activities

Member, Entrepreneurship Cell – SVERI

Participated as an active member of the Entrepreneurship Cell at SVERI, organized under NEC, IIT Bombay, engaging in innovation-driven activities, startup discussions, and entrepreneurial events.

Co-ordinator,SPIRIT Hackathon– SVERI

Coordinated a college-wide SPIRIT Hackathon, managing participants, logistics, and sponsor collaboration to ensure successful execution.
